# We build comfort by crafting your windows.

At LVMD, every detail is engineered for performance and elegance — bringing lasting quality, energy efficiency, and timeless design to your home.

# Casa G

## SKY-FRAME

Casa G by Alfredo Venotti is a striking example of how architecture and its surroundings can merge into one. With Sky-Frame's sliding glass walls, the residence opens fully to the outdoors, allowing light, air, and nature to flow seamlessly inside. A bold, minimalist design—crafted to elevate the experience of openness, tranquility, and refinement.

SKY-FRAME

“Beyond installation, LVMD is your partner in care. Quick repairs and custom maintenance plans keep your joinery performing for years to come.”

# Why the Material Matters

The frame material you choose doesn't just define the look of your windows — it shapes their longevity, maintenance, and how they age. At LVMD, we install Ottostumm frames using premium materials like hot-rolled steel, Cor-Ten steel, architectural bronze, stainless steel and more, so you get both beauty and performance suited to your style and climate.

**Hot-Rolled Steel**

Classic and robust, hot-rolled steel delivers strength and timeless industrial elegance with excellent structural performance

**Stainless Steel**

Corrosion-resistant and low maintenance, stainless steel offers a sleek, modern look — perfect for coastal or humid environments.

**Color-Coated Steel**

Versatile and customizable, color-coated steel allows you to match frames to any design palette while ensuring durability

**Cold-Formed Steel**

Lightweight yet strong, cold-formed steel is ideal for precise designs and energy-efficient solutions, offering both flexibility and stability.

**Cor-Ten Steel**

A living material that develops a natural patina over time, Cor-Ten adds warmth and character while protecting itself from the elements.

**Architectural Bronze**

Warm, luxurious, and unique. Bronze evolves beautifully over time, shifting from golden tones to rich patina for a truly premium finish.

# Villa Pirogovo

## SKY-FRAME

Designed by Erick van Egeraat, Villa Pirogovo harmonizes architecture and nature. Nestled in a pine forest along the Klyazma River, its sculptural form opens to the outdoors through Sky-Frame's frameless sliding windows. Expansive glass walls flood interiors with natural light, offering unobstructed views and a serene, minimalist living experience.

# Design Without Boundaries

With seamless lines and frameless precision, Sky-Frame transforms living spaces into open landscapes of light and freedom. The sliding doors and panoramic windows dissolve barriers, creating a fluid connection between interior and exterior.

True to the Bauhaus philosophy, every detail is reduced to its essence—pure form, uncompromising function, timeless elegance. What remains is not just a window, but an unobstructed view that becomes a living design element.

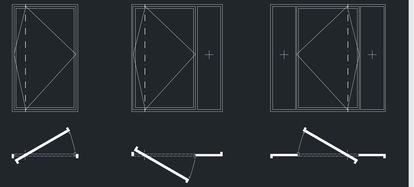
## Why the Pivot System Stands Out

A door is more than an entrance—it's an experience. With the Sky-Frame Pivot, a simple movement becomes a design statement. Thanks to its asymmetrically positioned axis, the glass-panelled pivot door swings open effortlessly with just a gentle push, creating a fluid transition that feels as natural as it is striking.

Safety and comfort are built into every detail: the multipoint locking system provides reliable security, while optional electromechanical



**Options**

Classic Pivot — Elegant motion with frameless design purity

Pivot with Multipoint Locking — Enhanced security and stability

Electromechanical Pivot — Smart, effortless operation at your fingertips
